

Dhanesh Phulphagar

Full-Stack Software Engineer(Pune, India)

dhaneshacad@gmail.com github.com/darayn linkedin.com/in/dhanesh-phulphagar dhaneshphulphagar.com

SUMMARY

Full-Stack Software Engineer with 4+ years building production systems in Python, JavaScript, and TypeScript. Core contributor across five repos at a D2C e-commerce brand — backend, checkout, ERP, CI/CD, and LLM tooling. Strong in database design, payment integrations, and full-cycle feature ownership.

TECHNICAL SKILLS

Languages	Python, JavaScript, TypeScript, SQL, C++, HTML/CSS
Frontend	Nuxt.js, Vue.js, React, Next.js, Svelte, Tailwind CSS, shadcn/ui
Backend	Flask, Django, DRF, FastAPI, Node.js, Express.js, Odoo
Databases	PostgreSQL (vectors, full-text search), MongoDB, Redis, Supabase
DevOps	Ansible, PM2, Git, AWS S3, Cloudflare R2, Vercel, Fail2ban
Integrations	REST, OAuth 2.0, WebAuthn, Stripe, Cashfree, CCAvenue, OpenAI API

PROFESSIONAL EXPERIENCE

Marchtee.com

2022 – Present

Core Contributor, Full-Stack Engineer — 5 Repositories

- march-shop** Flask · SQLAlchemy · PostgreSQL · Redis
- Rebuilt auth from scratch — RBAC, multi-device sessions, WebAuthn, OAuth 2.0, passwordless OTP; migrated CMS to database, assets to Cloudflare R2/S3
 - Redis caching with namespace isolation; PostgreSQL full-text search via tsvectors; payment gateway dashboard; post-order automation (COD, fraud, address validation); returns reconciliation engine; 50% faster page loads via optimized collections and query batching

- march-next** Nuxt.js · Vue · Pinia · PM2
- Single-page checkout — guest and authenticated flows, UPI, saved cards, Cashfree, CCAvenue, Pinia state persistence; 90% faster checkout, up to 40% conversion lift
 - Scaled to 7+ countries with full localization (currency, tax, language); integrated DHL, Aramex, India Post, ATC; 25% increase in international orders

- march-odoo** Python · Odoo v14 → v16 → v19
- Led v14 to v16 upgrade (module migration, ORM compatibility, data integrity); 10+ custom models for exchanges, returns, labels, shipping; owns ERP for inventory, invoicing, and reporting

- march-deployer + kavinath** Ansible · Frigate · FastAPI · LLM
- Ansible CI/CD replacing Fabric; handles 10+ on-demand deployments daily; hard deployments to bare metal with zero-downtime rolling updates
 - Frigate self-hosted warehouse surveillance across 3 locations with Drive backups via single command; LLM-powered internal ops assistant with FastAPI backend

Cognizant

February 2021 – June 2022

Programmer Analyst — ServiceNow Developer

- ServiceNow development, REST integrations, Walmart mainframe migration collaboration; built COWIN-integrated Vaccination Survey; ServiceNow CSA + CAD certified

CDAC

January – April 2020

Research Intern — Text-to-Speech

- Reimplemented Mozilla TTS for Odia language; implemented DeepMind WaveRNN in PyTorch as neural vocoder

PROJECTS

Foodcryption

Next.js · TypeScript · Supabase · PostgreSQL · Stripe · Razorpay · Vercel · Tailwind · shadcn — foodcryption.com

- Sole engineer on a subscription food ordering platform — auth, data modelling, ordering, payments, and production release
- Zero-downtime reversible migrations (feature flags, dual-write, auto-snapshot rollback); Stripe + Razorpay with idempotent order creation; 100+ orders in first 30 days

Gemald — MongoDB · Express · React · Node.js

- Full-stack e-commerce platform for paintings with payment gateway, admin portal, and role-based access control

FitBuddy — Python · Jupyter Notebook

- User recommendation system using cosine similarity and haversine distance across 5–10 fitness metrics

EDUCATION

Savitribai Phule Pune University

Bachelor of Engineering in Information Technology, 2017 – 2021

CERTIFICATIONS

- ServiceNow Certified System Administrator (CSA) ServiceNow Certified Application Developer (CAD)
