

Dhanesh *Phulphagar*

ABOUT

Core contributor across five production repositories at Marchtee.com since 2022 — backend, checkout, ERP, infrastructure, and AI tooling. Previously ServiceNow developer at Cognizant and research intern at CDAC on TTS for low-resource Indian languages. Building things that are fast, honest, and well-made.

SKILLS

LANGUAGES

Python, JavaScript, TypeScript, SQL, C++

FRONTEND

Nuxt.js, React, Next.js, Svelte, Vue

BACKEND

Flask, Django, FastAPI, Node.js, Odoo

DATA

PostgreSQL (vectors, FTS), MongoDB, Redis

OPS

Ansible, PM2, Fail2ban, Git, S3, Cloudflare R2

INTEGRATIONS

REST, OAuth, WebAuthn, Stripe, Cashfree, OpenAI

EDUCATION

Pune University

B.E. Information Technology
2017 – 2021

EXPERIENCE

Marchtee.com

2022 – present

Core Contributor · Full-Stack Engineer · 5 repositories

march-shop Flask · SQLAlchemy · PostgreSQL · Redis

- Rebuilt auth from scratch — RBAC, multi-device sessions, WebAuthn, OAuth, passwordless OTP
- Migrated entire CMS to database (navigations, collections, metadata, size guides); assets to Cloudflare R2/S3
- Redis caching with namespace isolation; PostgreSQL full-text search using tsvector for shop and catalogue
- Built payment gateway success rate dashboard; post-order workflows for COD detection, fraud flagging, fake address detection; returns and exchange reconciliation engine with discount considerations

march-next Nuxt.js · Vue · Pinia · PM2

- Single-page checkout — guest + authenticated flows, UPI, saved cards, Cashfree, CCAvenue net banking, cookie-based Pinia persistence
- 90% reduction in checkout time; up to 40% conversion lift; recognised by brands across the ecosystem
- International checkout with localisation for 7+ countries; integrations with India Post, DHL, Aramex, ATC

march-odoo Python · Odoo v14 → v16 → v19

- Led v14 → v16 upgrade — custom module migration, ORM compatibility, data integrity across all models
- Built 10+ internal models: exchanges, returns, splits, shipping service management, hangtag/stock/delivery labels
- Owns ERP layer for inventory, invoicing, financial reporting, purchase, and manufacturing workflows

march-deployer Ansible · Bash · Frigate · Listmonk

- Replaced legacy Fabric deployer with Ansible CI/CD — hard and soft deployments for shop, checkout, and Odoo
- Deployed Frigate self-hosted warehouse surveillance with Drive backups across 3 locations via single command

kavinath FastAPI · Python · LLM

- LLM-powered internal ops assistant (FastAPI backend); expanding with tool use and RAG over internal docs

Cognizant

Feb 2021 – Jun 2022

Programmer Analyst — ServiceNow Developer

- ServiceNow development and REST integrations; collaborated with Walmart on mainframe migrations
- Built Vaccination Survey integrated with COWIN API; ServiceNow CSA + CAD certified

CDAC

Jan – Apr 2020

Research Intern

- Reimplemented Mozilla TTS for Odia language with data preprocessing; DeepMind WaveRNN in PyTorch as vocoder

PROJECTS

Foodcryption

foodcryption.com

Next.js · TypeScript · Supabase · PostgreSQL · Stripe · Razorpay · Vercel · Tailwind · shadcn

- Subscription food ordering platform — sole engineer owning auth, data model, ordering, payments, and release
- Designed core schema for subscriptions, plans, schedules, coupons, and payment states with full auditability
- Stripe + Razorpay webhooks with idempotent order creation and failure recovery; 100+ orders shipped in first 30 days

FitBuddy

Python · Jupyter Notebook

- User-to-user recommendation system using cosine similarity and haversine distance across 5–10 fitness metrics
